The screenshot displays the MongoDB Atlas interface for a project named 'Smartbridge Lastmile'. The 'Clusters' tab is selected, showing a single cluster named 'Cluster0' with a 'FREE' tier. The cluster details include version 8.0.23, region AWS / Singapore (ap-southeast-1), and type Replica Set - 3 nodes. Below the cluster details, there are charts for 'Visualize Your Data' showing Read (R) and Write (W) operations, Connections, In/Out data rates, and Data Size. A table at the bottom lists various services like BACKUPS, LINKED APP SERVICES, ATLAS SQL, and ATLAS SEARCH.

Below the Atlas interface, a terminal window shows the following commands and output:

```
